## Correcting Charges Quick Reference Guide

This Quick References Guide for Correcting Charges provides an abbreviated look at how to correct charges associated with the four types of transactions (GL Journal, Voucher, Expense Sheet, and Facilities and Admin). This guide only applies to non-payroll transactions that took place in the Budget Reference (fiscal year).

### Additional Information:

- If a transaction on restricted funding needs to be moved after the fiscal year is closed, then you must create a GL Journal to move the transaction, regardless of what module it was created in (with the exception of payroll). When creating the GL journal, the budget reference used should be the current open bud ref, NOT the bud ref of the original transaction. The Cost Transfer Justification form must be attached along with supporting documentation of the expense you are moving, which should specify the module it originated in. The long description of the journal should identify that the entry is correcting a prior year transaction.
- For payroll transactions, please see the [Submitting an Express Direct Retro Request](#) tutorial for more information on moving prior year expenses.
